It is fine to submit this work individually for Level 2 learning. You will want to create your own diagram for Level 3.

Subject: Team E - assessment of fluency

Bro Tuckett,

Team E has a question about content developed at a team meeting. At our meeting today we created a state diagram. Our question is can we submit the drawing created as a team for our individual assessment profile, or do we need to create a state diagram individually. As a team we all submitted input and recorded the session, we can reference the time of the state diagram creation.

Bro. Tuckett,

I have attached my Fluency Review for your evaluation. I have included seven topics in the review. I have two more coding topics to complete. I will also upload them to the ILearn dropbox.

Brother Tuckett,

Thank you for the follow up email. I apologize for the delay in getting the final stuff submitted. I had. Nephew die in an accident and have been dealing with it this past week. I am taking tomorrow (Monday) off of work to complete what is left. My program is almost done, I believe I

just have to fix a few variables to get the database working, I have been working on my drawings as well.

Mark,

You can still pass this class. You need 31 points. Get me your professional behavior and journal. That plus one or two UML diagrams and you will be there.

Bro. Tuckett,

I will have those in tonight. I have have been struggling with my program to get it to work. I had it working and then make a change and broke it. I haven't been able to figure it out. I have attached the coding portfolio and I will upload it to iLearn.

Regards,

Mark Hodes

Mark, you currently have a 52 percent. You need 18 points to pass this class. Get me your professional evidence and journal report. Hopefully that will get you there. I need them by end of day today.

Troy Tuckett, MS, PMP
